Soft solutions for
a dynamic workplace

Creative solutions for new ways of working

We spend more and more of our working day in meetings: short or long, scheduled or, more often, impromptu. Traditional conference or meeting rooms aren't always the best forum.

They need to be supplemented by social spaces, in the heart of the office. Spaces that encourage work, meetings or just a few minutes' downtime. Spaces that create dynamics – and a living office.

The solution is office furniture that's governed by the way the company works, rather than by tradition. Furniture that puts the focus on results, rather than static workplaces.

EFG Hippione, EFG InTouch and EFG MySpace are three soft, comfortable and complete solutions, all developed with exactly that in mind.

EFG InTouch

Clean lines give the office character

EFG InTouch is a modular solution for reception and lounge areas, as well as impromptu meetings on the office floor. With hundreds of seating and colour combinations and its distinctive look, EFG InTouch also adds a splash of creativity to the company identity.

EFG InTouch is perfect for quick meetings, for people waiting – or just taking a break.

Combine sections with or without backrests, high or low; play with colours and fabrics and capture the character of the office.

EFG Hippione

Flexible meeting spaces for dynamic offices

With its nine modules, EFG Hippione provides a flexible solution for both new and traditional ways of meeting. Use it in compact or open spaces – in the middle of the action, as free-standing islands or lined up along a wall. And as the office changes, EFG Hippione can be changed to match.

EFG MySpace

A room within the room

EFG MySpace is a neat two-seater sofa that's specially suited to meeting places on the office floor – even when space is limited. With its high back and equally high sides, it acts as a perfect screen for sound and vision, both for people sitting in meetings and the people around them.

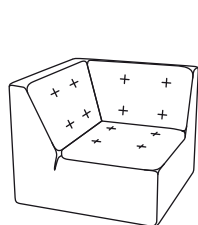

Enjoy the privacy created by the high back-rests, great for concentrating or relaxing.
