

Tables

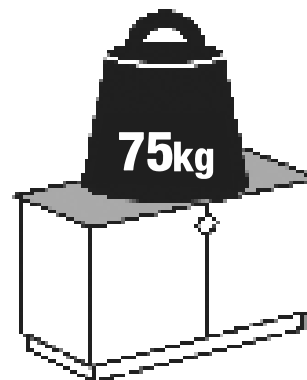

Maximum loading is 100 kg.

NOTE! Some height-adjustable tables have a lower lifting capacity.

Please be aware that placing bodyweight on table entails risk of tipping.

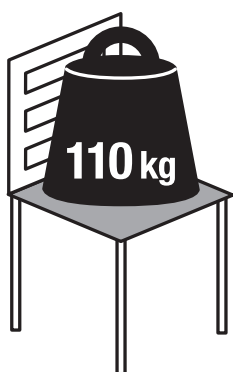

Storage

Maximum loading is 75 kg.

NOTE! Only applies to top panels, shelves have lower limits.

Seating

The chair is tested for normal use by persons up to 110 kg/seat.

Please be aware that the chair can roll to the side resulting in you sitting next to the chair.

Castors are available for different types of floors and areas of use.

Please take care not to exceed the maximum recommended quantity when stacking these chairs.

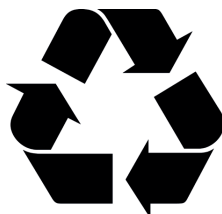

See separate info on stackability for each chair

General

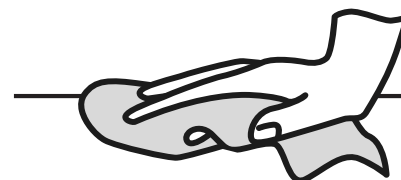

Any repairs to the furniture are to be performed by qualified personnel or according to the disassembly instructions.

Changes in the product beyond recommendation may cause deterioration of properties.

Our products are designed with remanufacturing in mind. The majority of our components are replaceable, contact us for spare parts. Materials shall be recycled in accordance with the prescriptions in force locally.

For cleaning of wood, plastic or metal parts it is recommended to use a soft cloth, slightly dampened with lukewarm water or water with some washing-up liquid or soap. You should absolutely not use stronger detergents.

For more detailed care information, follow separate care instructions.
