

Fliptop table for any setting

EFG's HideAway is a family of flexible fliptop tables that can be tilted or folded depending on the variant. With HideAway, you can exploit space optimally without having to compromise on design. The table is ideal for meeting and conference rooms as well as receptions, lobbies, schools and canteens.

With its excellent utility and modern design, HideAway is ideal in many settings. The table is as easy to set up as it is to move aside, and its flexible design makes it the ultimate for pop-up workspaces that demand quick furniture rearrangement. What's more, HideAway can be used as a stand-alone table or as part of e.g. a U setup.

HideAway is available in three variants: two fliptop pedestal tables in different sizes and one larger, folding conference table. The small, single-pedestal table comes with either a fixed or adjustable height and is available with a round, square or rectangular table top. The asymmetrical swivel base makes the table easy to stack and store. The twin-pedestal table and the folding conference table come with a fixed height and castors that make it easy to roll out of the way. Versatile HideAway is available in several different versions with white, black or silver stands that can be combined with table tops in FSC® certified* ash, beech or birch, linoleum or laminate. The castors are black and handles are available in both black and zinc.

As with most EFG furniture, HideAway is recyclable and all of its parts can be replaced, allowing the table to be renewed as necessary. Depending on the variant, HideAway comprises 52–59 % recycled material and 41–49 % renewable materials. The particleboard for the table with straight edges is manufactured from 100 % recycled material. HideAway's wooden table tops come from responsibly produced forests.

ABOUT EFG

The Swedish furniture company EFG has been producing high-quality, durable furniture for more than 135 years. EFG upholds form and function in our Scandinavian heritage and creates smart interior solutions that encourage people to work, meet and socialise. By designing flexible, long-lasting products, EFG drives the development of recyclable furniture and creates beloved products that are designed to last and be cherished. In line with EFG's design philosophy, the products feature a layer-by-layer design that allows components and upholstery to be replaced and repaired, making them easy to update over time.
